

FLEXIBLE AND COMFORTABLE

EXTRA LIGHT

MEMORY FOAM INSOLE

BREATHABILITY

HIGHEST SAFETY

LACUNA

We present new LACUNA safety shoes collection with exceptional technical performances based on soles made from low-density EVA or polyurethane foam.

In the sole production process, we applied special technology based on ethylene-vinyl acetate or polyurethane which are known as a very adaptable chemical substances, with wide range of application.

Our goal was to develop extra light, flexible, comfortable footwear from one side but also to achieve maximum user safety as well.

Final results is safety shoes with extra high flexibility and comfort and with the highest safety performances.

We use the highest quality materials for all parts of our safety shoes which provide durability, maximum safety and stability.

Each model in LACUNA FLOAT TECH® collection is unique by materials that have been used or by technical features and performances.

Therefore, you will easily find suitable model for almost each working situation.

Memory foam insoles, that adapts to all foot shapes, provides extreme comfort and anti-fatigue effect which make you feel like you **float**.

FLOAT TECH® collection is developed in cooperation with experts and reputable advisors involved in the development of safety and sports footwear of the world's most famous brands.

Beside the high tech performances and comfort, LACUNA FLOAT TECH® collection is also recognizable by contemporary and modern design.

Predstavljamo novu LACUNA kolekciju zaštitnih cipela, iznimnih tehničkih performansi na bazi đona izrađenog od EVA ili poliuretanske pjene niske gustoće.

Tijekom proizvodnje đona primjenjuje se posebna tehnologija obrade na etilen-vinil acetatu ili poliuretanu, koji su poznati kao prilagodljive kemijske tvari širokog spektra primjene.

Cilj nam je bio razviti izuzetno laganu, fleksibilnu, udobnu obuću s jedne strane, ali i postići maksimalnu sigurnost i zaštitu tijekom nošenja.

Konačni rezultat su modeli cipela s izuzetno visokom fleksibilnošću i udobnošću te najvišim sigurnosnim performansama.

Za sve dijelove cipela koristimo najkvalitetnije materijale koji omogućuju dugotrajnost, maksimalnu sigurnost i stabilnost.

Svaki model u LACUNA kolekciji FLOAT TECH® jedinstven je po korištenim materijalima ili tehničkim značajkama i performansama.

Stoga ćete unutar kolekcije FLOAT TECH® vrlo lako pronaći prikladne modele za gotovo svaku radnu situaciju.

Uložne tabanice na bazi memorijske pjene prilagodljive su svim oblicima stopala i pružaju iznimnu udobnost i učinak protiv umora zbog kojih se osjećate kao da **plutate**.

FLOAT TECH® kolekcija razvijena je u suradnji sa stručnjacima i renomiranim savjetnicima koji sudjeluju u razvoju zaštitne i sportske obući najpoznatijih svjetskih brandova.

Pored visokotehnoloških performansi i udobnosti, LACUNA FLOAT TECH® kolekcija je prepoznatljiva po suvremenom i modernom dizajnu.
